

Organic, Non-GMO, & Identity-Preserved

From the Field to You

For more than a century, The Scoular Company has shared a close connection with the people who are passionate about growing our nation's food. The American farm family has been and continues to be an important part of our business. And our involvement in the food supply chain doesn't end there. From sourcing seed to marketing ingredients, Scoular works to provide what our customers need to create healthy and nutritious products that today's consumers desire.

Food Ingredients

- Soya Flours
- Soya Oil
- Soya Grits
- Other Specialty Grain /
Oil Seed-based Ingredients
- Pea Protein
- Pea Fiber
- Pea Starch

IP Grain Marketing Program

Organic Certification

Scoular is certified organic by OneCert, an international certification agency accredited by the USDA National Organic Program (NOP).

Seed Management

The Scoular Company works with major seed companies to source the best varieties available for American farmers and end users.

Genetic Engineering & Chemical Usage

We contract non-GMO grains and monitor chemical usage. We manage a strict IP procedure to monitor and document the seed, as well as the planting, tillage, harvest, storage, and processing of the product.

Risk Management

Scoular contracts grains in every major growing region in the United States and Canada, providing a natural hedge against weather problems.

Transportation

Scoular ships IP grains and other products in containers around the globe. The company operates as a direct shipper with a Non-Vessel Operating Common Carrier (NVOCC) business, offering competitive rates and shipping over 130,000 twenty and forty-foot equivalent units in 2009.
