

# Nutritional Bars & Beverages

---

The Scoular Company leverages its global ingredient sourcing network to offer customers a range of highly functional and nutritious ingredients. By managing risk, supply, and quality, Scoular enables food manufacturers to do what they do best--produce safe, tasty, healthy foods for consumer enjoyment.

## **ISOPRO - Soya Isolate (non-GMO)**

Full range of functional, 90% protein (dry basis). Healthy solution for high-protein and/or low-carb formulations. Excellent amino acid profile coupled with heart healthy benefits of 25 grams of soya protein.

## **Hydrolyzed Wheat Protein**

Novel Hydrolyzed Wheat. Excellent solubility, pleasant malty flavor profile. Cost-effective alternative / supplement to dairy proteins. Excellent source of glutamine that studies suggest may be an essential amino acid during periods of stress, i.e. post-training / injury.

## **Prestige Protein - Pea Protein Concentrate**

50% protein (dry basis). Excellent emulsification capacity, oil and water absorption / holding, and foaming capacity. Benefits of non-GMO, gluten-free, low allergenicity, and clean labeling.

## **Winway® Polydextrose**

Multifunctional soluble fiber. Delivers texture and mouthfeel while managing calories, glycaemic index, fat reduction, and satiety. Prebiotic benefits.

## **Exlite Fibre - Pea Fiber**

Neutral-tasting, high insoluble and soluble fiber. Naturally processed without chemical extraction or modifications. Supports formulation of high-fiber, lo-carb healthy products.

## **Smart Salt® - Magnesal**

Natural solution for sodium reduction and management without compromising taste. Maintains flavor and preservation properties while adding essential minerals to the diet. Up to 60% sodium reduction.

## **Starlite - Pea Starch**

Neutral flavor, very low allergenicity, and clean labeling benefits. May be used to increase Resistant Starch (RS) and Slowly Digestible Starch (SDS).

# For quality nutritional ingredients, *Count on Scoular People.*

## **BBG - Barley $\beta$ -glucan Concentrate**

Highest levels of healthy  $\beta$ -glucan result from unique dry-processing of specially bred grain. Offers richest source of naturally healthy barley  $\beta$ -glucans on the market, delivering health benefits to nutritional products for heart health, low GI, satiety, and weight management. FDA recognized health claims.

## **Cocoa Powder**

Adds both flavor and color to beverages and bars.

## **Plant Sterols**

Plant sterol in the free or sterol ester forms. Plant Sterol Esters are believed to have a structure very similar to cholesterol and studies show that plant sterols may help reduce the absorption of cholesterol coming from food. Therefore, Plant Sterol Esters may help prevent cholesterol from being absorbed into the blood, thereby helping to promote healthy blood cholesterol levels. This can be added as a powder or liquid to many food products. FDA recognized health claims.

## **Soya Flours / Grits / Oils**

Non-GMO / Organic. Sourced and processed in collaboration with Scoular's Identity-Preserved / Specialty Grain sourcing teams.

## **Sweeteners and Soluble Fibers**

Non-GMO: Dextrose, Glucose, Maltodextrin, FOS, and GOS.

## **Lunasin XP<sup>®</sup>**

Lunasin XP<sup>®</sup> is a unique soy peptide with extensive research pointing to its benefit toward supporting cardiovascular health and positive impact on lowering inflammation. This bioactive soy component is the subject of research by more than 21 research institutions around the world, and has functional applications in dietary supplement, beverage, and food applications. Ask us about Lunasin XP<sup>®</sup> as a fortifier in soy protein isolate blends.
