

# So you want to work in **FACILITY OPERATIONS?**

Scoular is seeking individuals interested in grain facility operations. Scoular's Facility Operations Development Program is rotational and immerses participants in the daily management of a grain-handling facility.

## Overview:

- Learn to operate a grain-handling facility safely and efficiently
- Assist with personnel training and daily direction, gaining supervisory experience
- Obtain a thorough understanding of safety policies and procedures, ensuring employee safety and protecting company assets
- Provide outstanding service to Scoular's customers while building a competitive and sustainable operation
- Identify and implement operational changes and facility improvements
- Determine cost/benefit analysis to support proposals

## Requirements:

- Demonstrate knowledge of mechanized systems and industry equipment as well as possess a basic understanding of elevator operations
- Show initiative, energy, and customer-service orientation
- Possess effective communication skills
- College degree a plus, preferably in agriculture, mechanized systems, or related area

Scoular is an equal opportunity employer.
