

Petfood manufacturers demand natural, clean label and nutritious ingredients. Scoular's barley protein concentrate (BPC) is a high-quality, non-GMO, nutrient dense protein source. BPC uses a proprietary, patented, natural process which protects the protein from heat damage and removes fiber.

Consistent & Stable Supply

Share the Sustainability Story

Barley Protein Concentrate helps pet food companies support local farmers and sustainable growing practices. Grown high in the Rocky Mountains, barley is a profitable crop rotation option and promotes soil biodiversity and water conservation. And, you can rest easy knowing BPC is not a cause of deforestation.

Scoular has deep relationships with our barley farmers and can introduce you to one of our many farm families to help connect your products to the story.

Facility Highlights

We are building a new state-of-the-art facility in Jerome, Idaho with the highest level of food safety standards in mind – certified to the rigorous Global Food Safety Initiative benchmarked FSSC 22000 standards. The intended operational date will be August 2021.

Feeding Trials Underway

Feeding trials are currently underway with expected completion in April 2021, followed by AFFCO approval. Within these trials, BPC was formulated in a complete and balanced dog diet to serve as the control diet. Four other variable diets were formulated with similar protein, fat and energy values to the BPC control diet. The control and variable diets had similar ingredient makeups with the exception of the four variable ingredients; pea protein, corn gluten meal, chicken meal and fish meal.

Packaging

Bulk

Super Sacks

Totes

25 kg / 50 lb Bags

BPC does not contain the antinutritional factors such as those found in soy; phytic acid, tannins, trypsin inhibitors, lectins, saponins, and the indigestible oligosaccharides stachyose and raffinose.
