

**ENCOMPASS™**  
FISHMEAL BY SCOLAR

# The Encompass Piglet Advantage

Encompass provides access to the right fishmeal and oil solutions for piglet diets with no disruption in supply. As highly digestible and nutrient dense products with immunity boosting properties, including both fishmeal and fish oils in piglet feed formulations helps baby pigs to grow and transition to production feed faster—helping to create cost savings for you while supporting healthy development.

## Ask us about the benefits of dual inclusion in piglet diets.

Support essential requirements for protein intake and optimal physiological function, including cardiovascular, immunity, bone and joint, and cognitive development.

### Feed Intake & Growth

With high protein content (60-75%) and attractant properties, fishmeal added to piglet diets helps weaning animals move to and stay on feed, for improved feed conversion and intake.

### Immune System Benefits

Omega-3 fatty acids boost healthy immune system function. Including fish oil in can support piglet immune response when confronting disease.

#### Fishmeal

- High Digestibility
- High Protein Content
- Range of Micronutrients
- Essential Amino Acids
- Palatable Attractant

#### Fish Oil

- Anti-inflammatory Properties
- High Bio-availability
- Supports Cognitive Function
- Cardiovascular Health
- Balanced EPA/DHA Ratios

# Global, reliable & consistent fishmeal & oil

As a leading global ingredient supplier into feed formulations, we deliver flexible and valuable nutrition solutions for a variety of dietary needs and animal life stages. Encompass can help you source a safe and stable supply of fishmeal and fish oil that meets your unique needs.

Consistent quality

BAP / ASC assistance

Customized solutions

Reliable, year-round sourcing

Delivery around the globe

Certified sustainable products

MarinTrust and MSC Chain of Custody offerings

## Products

We source more than 15 different species of marine proteins from over 40 countries and regions around the world. Depending on the supplier, we can offer trimmings, certified sustainable or FIP products that are fully traceable and maintain full chain of custody. We're also well-versed in industry certifications to ensure we're providing you a high-integrity solution.

- Trimmings: Salmon, White fish, Tuna, Mackerel, Shrimp and more
- Sustainably Certified Species: Sardine, Sardinella, Menhaden, Anchovy, Herring, Tuna

## Sustainable Offerings

Originate products, both wild and farmed, that hold certifications like Marin-Trust, IFFO-RS, MSC, ASC, and trimmings meal to eliminate our carbon footprint.

## Custom-Made Proteins

Whether its combining ingredients, homogenizing, or a specific spec, we can customize ingredients to fit your nutritional requirements.
