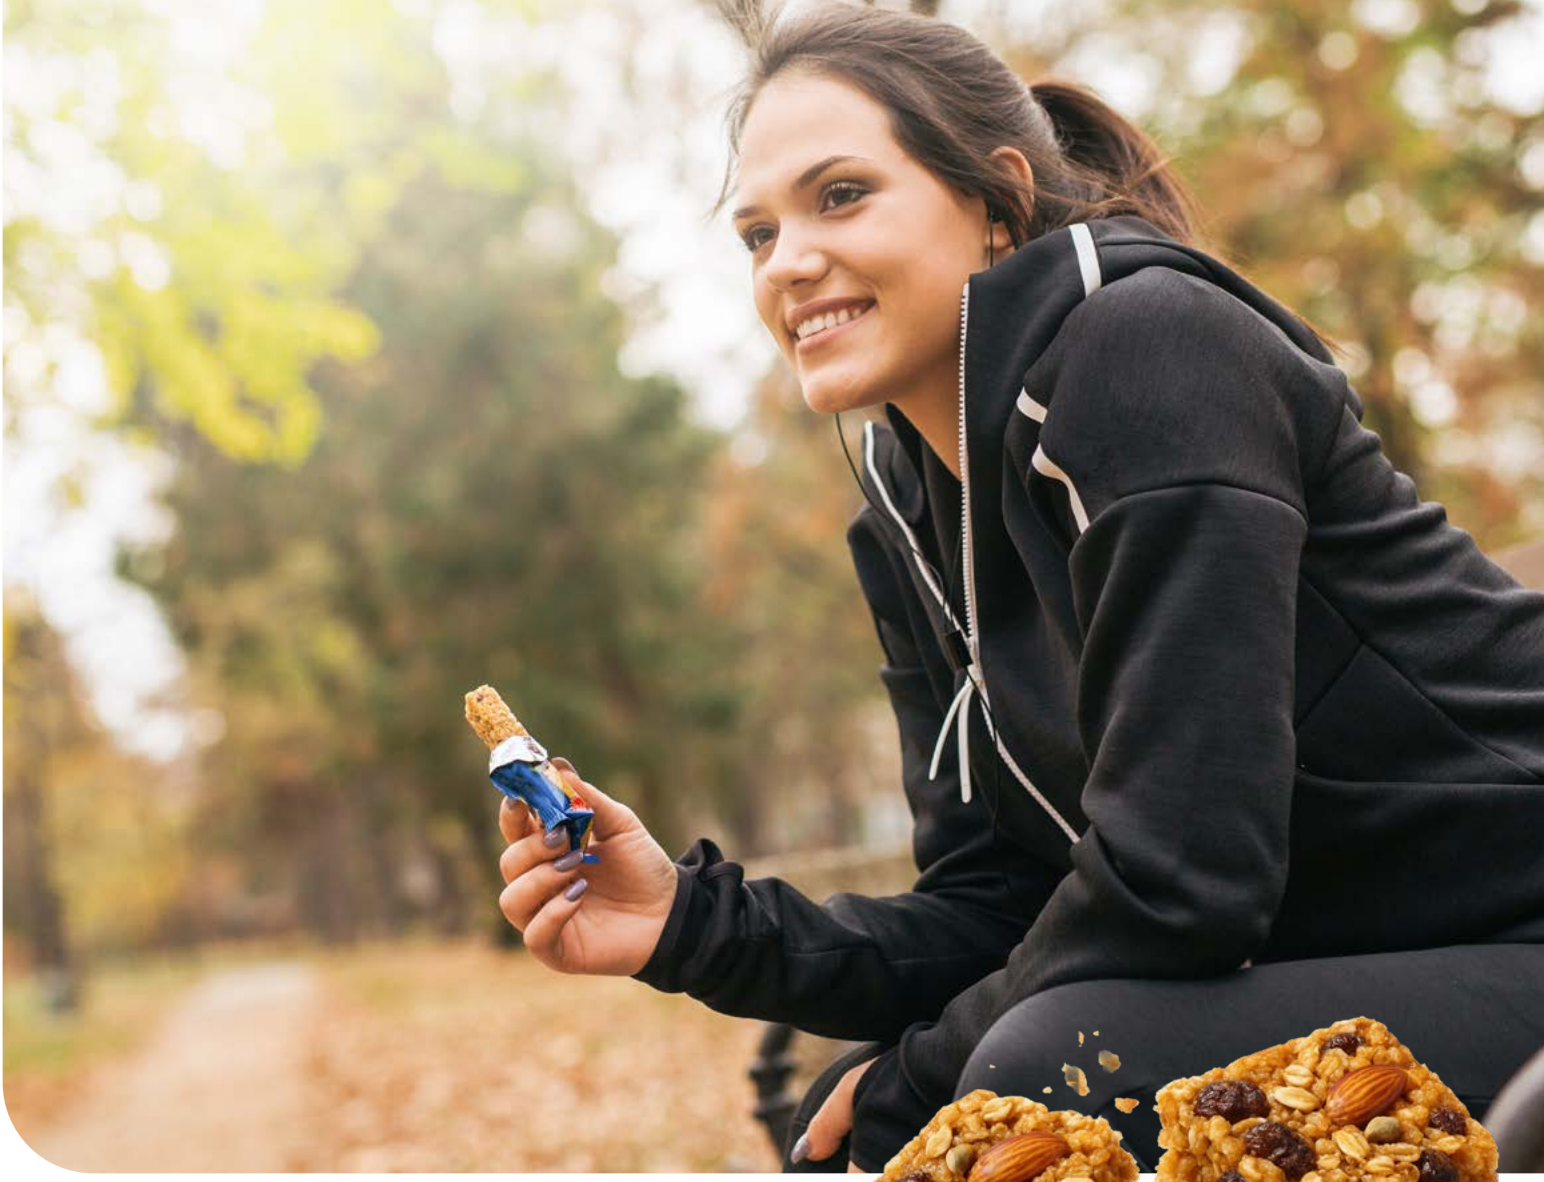
Scoular can help you find the best solutions for your applications.

Sugar reduction is a major trend in the food industry with consumers demanding healthier and more natural products. However, reducing sugar in food applications can be challenging, as it affects not only the taste, but also the texture, shelf life, and functionality of the product. That's why you need Scoular, a leading supplier of food ingredients that can help you achieve the sugar reduction you want, without compromising on quality or performance.

With Scoular's Products You Get

- Consistent functionality
- Improved nutrition
- Desired sensory experience
- Clean labeling



Formulating for Sugar Reduction

In the ever-evolving food industry, the demand for healthier and more functional product options has led to significant advancements in sugar reduction ingredients. Formulating products with reduced sugar content involves navigating a delicate balance between taste, texture, functionality, and consumer appeal.

With many sugar alternatives available in the market, product development can be a maze of trial and error to find the right ingredient to solve the right problem. R&D scientists and product developers can help ensure a successful sugar replacement outcome by understanding the options available to overcome key considerations and challenges from the onset of formulation.

Ingredient Solutions

Allulose

A naturally occurring rare sugar offering a clean, sweet taste profile similar to sucrose and almost zero calorie content, allulose can resonate with consumers seeking more natural alternatives.

Chicory Root Fiber

Being a natural source of dietary fiber, this prebiotic ingredient offers significant benefits for sugar reduction and nutritional enhancement, appealing to customers wanting more clean label ingredients in their products.

Low Sugar Brown Rice Syrup

A light amber colored syrup used as an alternative to Corn Syrup and HFCS in various applications. Beyond flavor and composition, it can also offer functional benefits such as binding, browning, and texture control.

Soluble Corn Fiber

An excellent multi-functional ingredient for sugar and calorie reduction, while simultaneously boosting the fiber content of your products. With minimal GI impact, it can be a well-received addition to product labels.
